

SE#: Symphony JBOSS Hot Fix 10-20-10

Security Enhancement Notice

Two security vulnerabilities have been identified with the JBOSS web server platform, which is used by the MICROS *Simphony* application.

The following versions of MICROS *Simphony* are affected by these JBOSS vulnerabilities:

- v1.2
- v1.4
- v1.5

Details associated with these JBOSS vulnerabilities can be found at the following links:

<http://web.nvd.nist.gov/view/vuln/detail?vulnId=CVE-2008-3273>

<http://web.nvd.nist.gov/view/vuln/detail?vulnId=CVE-2010-2227>

MICROS strongly recommends the following action be taken to remediate these JBOSS security vulnerabilities:

For MICROS customers operating any of the *Simphony* versions listed above, a hot fix is available from MICROS which corrects these vulnerabilities. This hot fix, containing the corrected file and implementation directions, can be downloaded from the *Simphony* product support area of the MICROS member's services website.
