These systems help control costs and resources, so you can improve profitability and efficiency.

PBX Phone Systems

RedSky IT is a Mitel Platinum Solutions Provider. Mitel systems rate among the most reliable in the industry and feature many functions designed specifically for the lodging industry. They include:

- VoIP and TDM Solutions
- Nationwide Installation and Service
- PMS Interfaces
- E911 Notification

Our PBX systems can handle the telecom needs of any property. From economy to luxury hotels, these systems provide high quality guest services while helping you manage costs.

PLATINUM
SOLUTION PROVIDER
HOSPITALITY SPECIALIST

Call Accounting Units

RedSky IT distributes the TelElectronics call accounting unit. This system is synonymous with hospitality call accounting. The product is ideal for any organization that must track the call activity of short-term users.

On Hold Messaging

RedSky IT offers custom message-on-hold programs. This program uses the music-on-hold feature of your telephone system to "speak" to your callers "one on one" while they are on hold.

Voice Mail Systems

RedSky IT has a solution that can meet the demands of any hotel property. Features include:

- Automated Attendant to answer incoming calls (e.g. provide directions or local amenity information)
- Easy to use guest and staff voice mail
- Voice mail holding box at check-out
- Automated wake-up call system
- PMS system interface

InnOvation

Guest Room and Front Desk Telephones

RedSky IT distributes guest room telephones that fit the needs of any size property. They optimize the way calls are placed, answered and controlled.

High Speed Internet

Business travellers demand high speed internet connections. RedSky IT has wired and wireless solutions available with 24x7 end user support.

Cabling and Terminations

RedSky IT has the capacity to run voice and data cables in your property and terminate all runs.
