Financial Management

RES Financial Management (FM) is a flexible reporting and analysis tool that helps you understand the profitability of your operation. Easily define and generate custom applications and reports that meet your specific concerns and needs. Using RES FM, you can access real-time data from all applications in the MICROS Restaurant Enterprise Solution database. This includes sales information from the point-of-sale system, labor data from Labor Management, and inventory data from our Product Management application.

Customize reports, or create your own, to oversee and operate all of your accounting needs with RES FM.

REAL-TIME FINANCIAL REPORTING IS KEY TO EFFECTIVE MANAGEMENT

Reports That Give You a Precise, Up-to-the-Second Picture of Your Business

- Customize financial reports to get real-time information
- Format reports to track actual, budget, or projected business data

Access real-time data and supplement it with your own data to build the report you need. It uses the industry standard report format tool, Microsoft® Excel®, for added flexibility in generating new reports.

Multiple Reporting Period Options

- Daily, Weekly, Monthly, Quarterly, Semi-annually, Yearly
- Work in multiple periods
- Review closed periods

Flexible Reporting Functionality

- Design and generate new reports using the Developer's Kit
- Precise, up-to-the-second snapshot of your business

Examples of Customizable Reports

- Profit & Loss
- Daily Sales Reconciliation
- Labor
- Cost of Sales
- Deposit Record
- Expense Summary

A powerful tool that can be customized to fit your accounting needs
