

## Security Enhancement Release Notification

MICROS Systems, Inc. (MICROS) has developed and released a new security-related enhancement for certain versions of its MICROS Restaurant Enterprise Solutions (RES) product line. This security enhancement applies to users who are operating MICROS RES feature versions; 4.0, 4.1, 4.3, 4.4 or 4.5, together with the CA/PMS credit card driver. This security enhancement does not apply to users of MICROS RES v4.6 or higher or those MICROS RES users who are not also using the CA/PMS driver.

MICROS will make this security enhancement available to its MICROS RES users at no charge. The installation of this security enhancement by MICROS personnel is a scheduled event and is a chargeable service. MICROS recommends the installation of this security enhancement be applied by trained personnel.

MICROS strongly recommends that all users of MICROS RES versions; 4.0, 4.1, 4.3, 4.4 or 4.5, together with the CA/PMS credit card driver, either apply this security enhancement or upgrade to MICROS RES version 4.6 or higher. This security enhancement is available through your MICROS Account Manager or local MICROS Servicing Agent.

For security reasons, MICROS does not publish details pertaining to its Security Enhancements.
