

myinventory Enterprise Support Solutions

The *myinventory* application is browser-based and is part of the mymicros.net Enterprise product line. The *myinventory* enterprise solution provides tools for the daily tasks associated with managing in-store and company-wide inventories. The *myinventory* application provides cumulative, daily, and ad hoc reporting related to ordering, receiving, waste, inventory counts, and more. Reports can be generated by item groups, items, vendor, cost center, and enterprise. Manage your inventory efficiently without the need for installation at the store level by using the *myinventory* web browser to quickly retrieve data and save your business money.

EFFICIENTLY MANAGE INVENTORY TO CONTROL EXPENSES

myinventory

The *myinventory* applications provides unit and corporate-level operators a comprehensive solution for managing and controlling the business processes of Vendor Bids, Ordering, Receiving, Invoice Approval & Reconciliation, and Inventory. Based on real-time menu item sales gathered from the point-of-sale (POS), the application calculates product usage and depletes values from stock on hand, waste, transfers, and actual inventory.

Highlights

- 1 Simplify store-level processes and optimize inventories
- 1 Provides the necessary information to maintain stock in a cost effective manner
- 1 Enables managing inventories at either a single cost center or multiple locations
- 1 Commissary support included
- 1 Integrated within the browser-based mymicros.net portal
- 1 Generates running and daily totals for all tasks associated with ordering, receiving, and conducting inventory counts, by store, enterprise, vendor, and/or item
- 1 Summary of daily totals for inventories on-hand and used
- 1 Purchase order and daily receipt summary, line item detail, and adjusted data
- 1 Complete overview of purchases by vendor, store, and item and other broad-line foodservice distributors
- 1 Compatibility with electronic data interchange (EDI) and third-party applications from suppliers like Sysco and other broad-line foodservice distributors
- 1 Zero installation at store level; all that is required is a web browser
- 1 Optimized for the MICROS RES, MICROS 8700, MICROS 9700 HMS, or Symphony solutions and in mixed environments to any point-of-sale system that is feeding data to the mymicros.net enterprise information portal
- 1 Completely point-of-sale independent at the enterprise level
