

Vision Executive is a dynamic analysis and reporting application that provides full facilities to summarise, explore and understand information directly from MICROS-Fidelio applications.

Vision Executive

Vision Executive for MICROS-Fidelio

Vision Executive for MICROS-Fidelio is a dynamic analysis and reporting application that can be utilised at your desk or across the web.

Vision Executive provides tools to help uncover and analyse trends, problems and opportunities that are often concealed within property data.

Reporting is not limited to a single application. Vision Executive can combine data from multiple applications into a single, concise report.

Executive Analysis

Delve further into the details of your report by applying Vision Executive's analytic functions: Drilldown, Expand, Breakout and Cube Analysis.

Frequently used analysis paths can be saved and used to update report data. The stored analysis paths are available every time a report is prepared.

Vision Security

Vision Executive provides security features to ensure that only authorised users can access sensitive data. The data a user can access will depend on the privileges assigned to that user.

Vision Executive for MICROS-Fidelio

*presents a top-down view
of your entire business.*

*It provides unparalleled
precision and control*

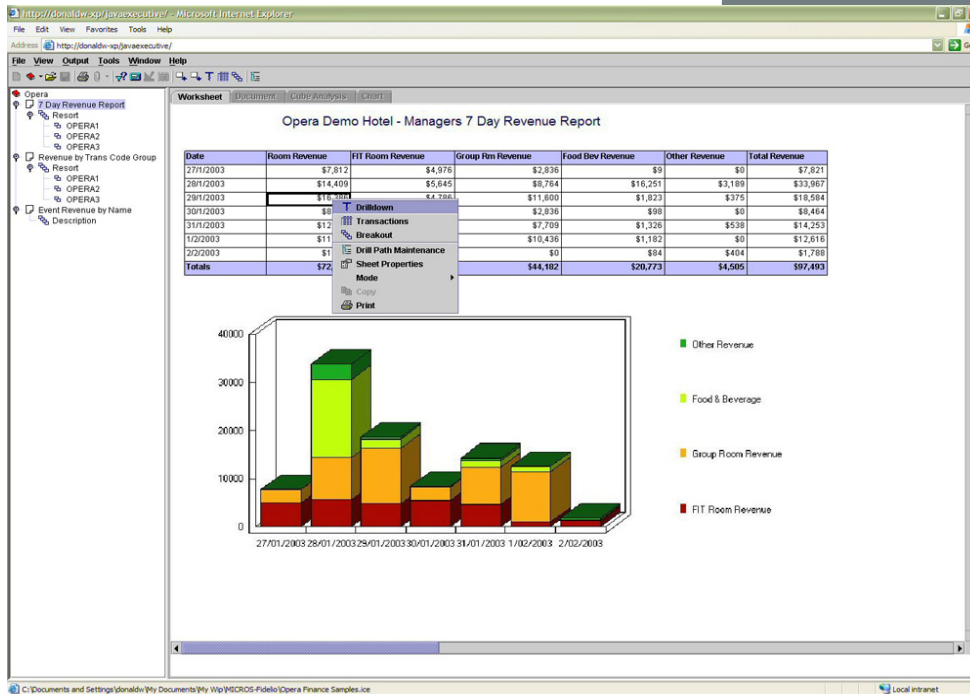

*in multi-dimensional
analysis through direct*

*access to your properties
from within a Windows*

*environment. Inquiries
are easily defined with*

*built-in guides to locate relevant
data, enabling selection to*

*be made at the click
of a button.*

Executive Breakout

Breakout automatically creates like reports based upon the combination of the selected output items. Multiple levels of Breakout could be applied to a query. For example you can breakout a report by market code, source code and period.

Drill Path and Drill Data

The functions Drilldown and Breakout create drill paths, which can be saved and replayed. You can choose the format and layout of drill results. Your design preferences are maintained for future drill results.

Review Retained Reports

This functionality allows the review of retained reports. This versatile tool ensures that Vision Executive operates at an optimum level of performance and reduces the need to re-extract data every time.

Report Prompting

Report Prompting allows you to define the main criteria that drives the report such as a date range. Before the report is extracted, the parameters can be modified using intelligent prompts.

Executive - Browser Access

Vision Executive (Browser) contains all of the analysis and reporting features found in Executive. By using the Java platform, you can deploy Executive workbooks over the Internet with full functionality in a web based Java application.

Product Features

- Powerful standalone reporting package.
- Incorporates a worksheet, document output and charting facilities.
- Enables multi-dimensional and flexible analysis.
- Offers data analysis tools, such as Drilldown and Breakout.
- Output of results in multiple formats, including Microsoft Office, PDF and HTML.
- Includes full archiving facilities.
- Client and browser versions provided.
- Perfect tool for desktop dashboards.
