

**MICROS
Mini Kiosk**

seamlessly integrated...surprisingly open

micros[®]

Highlights

- The MICROS Mini Kiosk solution uses the Hypercom Optimum M4100 Blade. Optional accessories include (but not limited to) a printer, docking station, and carrying cases. Please see the M4100 Parts Guide for the full listing of available accessories (http://www.hypercom.com/library/Mobile/M4100/M4100_Parts_Guide.pdf)
- The M4100 will connect to the MICROS Gateway which is hosted in the MICROS Data Center.
- The M4100 is available in two models:
 - GSM / GPRS (Cell Network) which requires the use of SIM cards from a cell provider. Unlimited Data Packages are available per SIM card
 - WiFi using the 802.11 G protocol
- For Credit Card Payments, the Mini Kiosk solution can be configured to use the OPERA Credit Card Interface or use the MICROS Gateway

Supported Versions

The MICROS Mini Kiosk is available with OPERA v5.0.1.03

Functionality

- The Mini Kiosk has the ability to query Arriving reservations using any of the following:
 - Guest's Last Name
 - Confirmation Number
 - Membership Number
 - Credit Card
- Guests who provide a credit card to secure their incidentals and room charges may be checked in via the Mini Kiosk
- The Mini Kiosk does not provide the ability to make room keys, therefore ALL rooms keys will need to be pre cut
- Guests can either be pre-blocked into rooms or allow the KIOSK API to choose the next available room for check-in
