

Oracle Security Releases for Opera

10.2.0.4 patch 26 for Opera completed

Date	Bulletin	Details	Documentation	Notice
11/16/2009	We have completed certification testing of Oracle version 10.2.0.4 patch 26 for Opera installations. This certification applies to Opera versions 5.0.01.03 e-patch 3 (*note1*) and above.	This patch includes the October 2009 security patches issued by Oracle.	This will be uploaded to the MICROS member website's technical documentation section on steps to apply the patch and location for the patch media.	Opera application does not require this upgrade. We do however highly recommend it be installed for PCI-DSS compliance.
