

**Vision XL provides a dynamic link to MICROS-Fidelio and your back office accounting system without the need for exports or warehousing. Data extracted to Excel from multiple database tables can be compiled into a single report.**

## Vision XL

### Vision XL for MICROS-Fidelio

Vision XL is an intuitive addition to the capabilities of Microsoft Excel and provides fast, adaptable ways to extract data from MICROS-Fidelio Hotel Systems and MICROS 3700 POS. Vision XL greatly enhances the already extensive functionality of Excel, enabling powerful reporting and presentation. Vision XL provides a dynamic link, by extracting real-time information from multiple tables in the MICROS-Fidelio Hotel Systems and MICROS 3700 POS into a single Excel report. With its flexibility and ease of use, Vision XL allows non-technical staff to effectively analyze data from within a familiar desktop environment. Vision XL has pre-configured the necessary relationships between the data tables of MICROS-Fidelio Hotel Systems and MICROS 3700 POS and uses plain English for titles and table columns. There is therefore no need to understand the complex database structure of MICROS-Fidelio, enabling you to develop reports easily and quickly.

### Comprehensive Enterprise Reporting and Analysis

Vision XL enables information to be extracted to Excel, and then combined with key data from other applications such as MICROS 3700 POS and your back office accounting system, or external sources held in Excel. Information held in multiple tables can be contained within the same report.

*Vision XL incorporates built-in calculation logic enabling you to define your own reports more easily.*

*Vision XL has pre-configured the useful relationships between the data tables of MICROS-Fidelio Hotel Systems and uses plain English for titles and table columns.*

### Built-In Calculation Logic

Vision XL incorporates built-in calculation logic enabling you to define your own reports more easily and to be confident of the accuracy. This is especially suited to any Period Reporting where for example, a large group staying through the period end can dramatically skew the results, due to the report totalling their entire stay. Vision XL has the ability to calculate this scenario accurately and with no need for any difficult formulas.

### User Defined Reporting

You can choose to include Package allowances, or net of tax revenue figures and also define your own criteria or filters for your reports.

### Powerful Reporting Capabilities

A powerful Report Designer in Vision XL provides flexible reporting formats. Report Designer includes the use of headers, details, subtotals and footer sections to provide professional reports. Vision XL also enables the diverse range of report styles, formats and printing options available in Excel to be applied to business data. The data can be refreshed or extracted at any time and then prepared and printed using Excel.

### Automate Processes with Macro Builder

Macro Builder enables you to combine Vision XL functions to automate complementary tasks without intervention. With the click of a button, different types of data can be extracted, processed in Excel and either returned to your application or displayed for viewing and printing. Additionally, custom report packs can be easily developed, allowing non-technical staff to run reports with ease.

### Features

- Vision XL functions provide a dynamic link between Excel and MICROS-Fidelio.
- Access and report on live data rather than pre-summarized data.
- Drill down from aggregated to detailed data.
- The powerful Report Designer provides for flexible reporting.
- Macro Builder enables the automation of Vision XL tasks.
- Use Data Selector to create and display a dynamic lookup from the MICROS-Fidelio database.
- Perform statistical reporting using Extract modes such as Sum, Count, Distinct Count and Averaging Modes.
- Vision Setup can be used in conjunction with Vision XL to restrict access to certain tables.
- Vision provides security features to ensure only authorized users can access sensitive data.
- Rich multi-lingual and multi-currency functionality.
