Service Solutions

MICROS Hosting Services

MICROS offers a variety of managed services to customers running MICROS enterprise applications. These services are offered to customers that elect to have MICROS host their applications in one of the four MICROS Data Centers around the world, as well as to self-hosting customers. MICROS will develop a custom service solution to meet the customer's specific needs.

The proactive monitoring and alerting service identifies problems before they occur, resulting in less issues and faster resolutions. MICROS takes complete ownership of maintaining your servers, with alert monitoring every hour of every day. Relieve yourself of IT worries, by letting MICROS manage your servers for you and spend more time focusing on what matters most, your customers.
